

One Day Bathroom Professionals

Cleaning Instructions

For Best Results,

- Clean the bathing area with a soft cloth, sponge (safe for Teflon surface) or soft brush and warm water.
- To soften mineral deposits, use a solution of vinegar and water.
- REMEMBER: Always thoroughly rinse your bath or shower system with warm water after cleaning.
- Regular cleaning maintenance is required at least once every two weeks, to avoid soap scum buildup

DO NOT USE:

- DO NOT use your new bath or shower for at least 12 hours after installation.
- DO NOT use recommended cleaning products for at least one week after installation.
- DO NOT use abrasive cleansers, such as Soft Scrub, Comet Scratch Free, cleaning powder or scouring pads (to test for abrasive agents, rub a small amount between your fingers ... if it is rough, it will scratch your acrylic system).
- DO NOT use any products with Ammonia-D or acetone (nail polish remover)
- DO NOT use products using an aerosol propellant
- DO NOT use products with harsh chemicals such as Lysol Disinfectant, Dow Disinfectant and Lestoil
- DO NOT use crystal drain cleansers
- DO NOT use any leave on cleansers

Most store bought, non-abrasive and non-aerosol bathroom cleansers are safe to use, such as Glass Plus, Pine-Sol, Fantastik, and Mr. Clean.

CLEANERS THAT SHOULD BE USED
